Shared extras (same price on every VPS plan)

Additional IPv4, extra storage and private networking use the same shared FOSS add-on products on every Cloud and Premium VPS tier. Select them during checkout for any plan.

Additional IPv4

Rs 1,499/mo · Rs 17,988/yr

Extra dedicated IPv4 address for your VPS.

Extra Storage 250 GB

Rs 1,299/mo · Rs 15,588/yr

Additional 250 GB object/block storage.

Private Network

Rs 999/mo · Rs 11,988/yr

Private Layer-2 network (VPC) between your servers.

Windows and backup fees vary by plan size; shared extras above do not. Annual extras cover 12 months; base-plan discounts do not apply to licenses or backup fees. Cloud VPS uses Europe for online orders; Premium VPS uses Virginia, United States. Premium plans already include one daily provider snapshot (typically the latest daily copy). Paid backup rows on Cloud VPS add that daily snapshot for plans that do not include it — they do not add longer retention, extra generations or an offsite customer vault unless the add-on description says so. Alternate server locations outside the included region need a **location quote**. Existing service prices follow their current order terms.
